## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, drawn to an apparatus for producing wire reinforced cast members, classified in class 425, subclass 117.
  - II. Claims 28-29 and 37-40, drawn to a method for producing in a mold assembly a cast member, classified in class 264, subclass 274
  - III. Claims 21-27, 30-36 and 41-44, drawn to an step insert or step insert and pin assembly which is embedded in a cast member, classified in class 182, subclass 90.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the method as claimed can be practiced by another materially different apparatus with the sealing flange for preventing seepage.

Inventions of Group II and Group III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the step insert as claimed can be used in a materially different process such as an injection molding process rather than a casting process.

Inventions of Group III and Group I are related as product and apparatus for use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the apparatus for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different apparatus for using that product (MPEP § 806.05(h)). In the

Art Unit: 1732

instant case, the product as claimed can be used in a materially different apparatus for using such as an injection molding apparatus rather than a casting molding apparatus.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to applicant's attorney Louis Weinstein on June 14, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael I. Poe whose telephone number is 703-306-9170. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jan H. Silbaugh can be reached on 703-308-3829. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7718 for regular communications and 703-305-7718 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
